

Hutton Hub and Immersive Suite: web proposal

Sep 21, 2026

We're proposing to rebuild the Craigiebuckler campus page as a Hutton Hub sales page, with the Immersive Suite as the headliner, and add a dedicated Immersive Suite page beneath it.

Why

The Immersive Suite is well used internally, but it isn't yet generating any income. It's also the one thing in the north-east that no hotel or conference centre can copy, so it should be doing the heavy lifting in selling the whole Hub.

The timing is right. The [£40,000 LiDAR landscape project](#) starting in October will give us showcase content, the [Nature Restoration Skills Hub](#) will raise the suite's profile, and away day planning for 2027 is starting now.

Being found in search

This project is as much about search visibility as it is about new pages. Most venue buyers start with Google, not a phone call, and right now we're effectively invisible for searches like "immersive venue Aberdeen", "away day venue Aberdeen" or "unique meeting venue Aberdeen", because no page is built to answer them.

Outreach only reaches the people we already know about. Search catches the ones we don't: the PA planning next spring's away day, or the developer hunting for a consultation space. Think of it as a salesperson who works nights and weekends and never takes a holiday.

The pages will be built for search from day one: one page per buyer need, the right keywords in titles and headings, FAQs that answer real questions, a single consolidated Hub URL, and a Google Business Profile and venue directory listings all pointing back to us.

What we're proposing

- **Hutton Hub page (existing URL):** sells the whole venue, all spaces, catering and three clear packages, with the Immersive Suite front and centre.
- **Immersive Suite page (new):** a dedicated page built to win searches like "immersive venue Aberdeen", with a showreel, ready-made experiences and ideas by audience.
- **Tracked enquiries:** HubSpot forms on both pages replacing the current email link.

The experiences we'll offer

Most buyers don't have 360 degree content, so we'll give them a menu to pick from.

Experience	What happens	Best for
Fly over Scotland	Soar across real Scottish landscapes built from national	Away day openers, visiting

Experience	What happens	Best for
	LiDAR mapping	clients
Our own strategy game?	Idea: Teams steward a Scottish glen over three decades, balancing profit, carbon, nature and community as the landscape changes around them, with real Hutton scientists popping up as expert advisers	Strategy days, team building, estate and landowner workshops
Learn in the landscape	Training delivered inside the habitats being studied, from peatland to woodland	Biodiversity and restoration courses, CPD
Take a breather	Calm woodland scenes and soundscapes	Wellbeing sessions, conference breaks
Bring your own	Your video, slides or models on all four walls	Launches, presentations
Made for you	Custom content designed by our team	Consultations, showcases, big moments

Who we're selling to

Audience	Examples	What they need to see
Event agencies	Prime Events, Event Collection, Live Event Management	Trade pack, showreel, capacities, trade rates, fast response
Corporates planning away days	SLB, Johnston Carmichael, local SMEs	Full-day package, catering, price guide, "what we'd actually do"
Energy and renewables firms	Developers, Just Transition businesses	Landscape visualisation, consultation use cases, net zero story
Training and CPD providers	Professional bodies, land agents, training firms	Room layouts, tech spec, half and full day rates
Public and creative	Festivals, film screenings, immersive dining	Ticketed event examples, what's on, how to propose an event

Joining up with wider Hutton plans

The suite shouldn't just be a venue. It can be the shop window for the commercial and fundraising work already underway.

Initiative	How it connects
Scientific Services training offer	Short courses and land-use workshops could launch here; "The Glen" doubles as a paid workshop for estates and landowners
Nature Restoration Skills Hub	Already committed to peatland restoration CPD in the suite, our first training customer
Philanthropy office	A persuasive tool for donor evenings, major donor briefings and tercentenary events

What I need

- **Pricing:** agreed "from" prices for each package, plus agency trade rates, and confirmed room capacities from Venue Services.
- **Commercial availability:** suite slots protected each month for paying bookings.
- **Enquiry ownership:** a named owner and a one working day response target.
- **Contract videographer:** A 60 second showreel and professional photography (quotes to follow).
- **Ready-made experiences:** three or four pieces of suite content so buyers don't need their own.

How we'll measure success

Paid suite bookings, Hub hire income, enquiries through the new forms, tours booked and search visibility, aiming for page one for our key venue searches within six months. Targets to be set once we've pulled a baseline from the last six months of bookings and search data.
